Strength is innovation.

Find your strength.

DO YOU EXPERIENCE PHANTOM LIMB PAIN?

You may qualify for a research study which is investigating whether a type of non-invasive brain stimulation called transcranial Direct Current Stimulation (tDCS) combined with Somatosensory training can change your pain perception.

This research study requires up to 23 home-based visits over 13 weeks.

Requirements:

- ✓ Are over 18 years
- ✓ Had any limb amputation
- ✓ Have been experiencing chronic pain over the amputated limb

Earn up to \$345 for your participation.
