

Powered Prosthetic Leg Research

The University of Michigan is looking for:

- Healthy adult volunteers, 18-70 years old
- With a single above-knee amputation
- Willing to be compensated **\$40/hour**

This research studies design and control of powered prosthetic legs and will help develop new prosthetics to improve quality of life.

Testing sessions will take place on the University of Michigan North Campus. Testing includes walking, stair climbing, sit-stand, and other lower-limb activities in a laboratory environment. Participants may be eligible for travel and lodging reimbursement. Contact the study team for more information.
